

9th March 2006

Eftpos Specialists (Taranaki) Ltd installed 16 EFTPOS terminals and trained each of our 11 branches in November 2005.

We have found their service and support outstanding as being a Stock and Station Company; our customers require quick and efficient service from us. So having our EFTPOS terminals out of action is not an option for us.

We find the terminals very easy to operate with a fast transaction time and our customers find the pin pad easy to use with the big numbers and backlit screen.

We would highly recommend Eftpos Specialists (Taranaki) to any other business that are not just looking for an EFTPOS machine but a company who technically understand and can support their terminals.
